

POPULATION AND SERVICE ASSESSMENT: EVALUATION OF TARGET POPULATION

This form can be used as a guide to plan your DSMES services. You may fill in this form with information about your program plans or provide a separate document describing your target population in your own words. A summary of the target population can be provided in a written narrative in your own words. Please include your information sources/references with the date information was accessed.

This information is available from a variety of sources, including but not limited to community needs assessments by local or state health departments, health systems/organizations specific to the populations, and DSMES data.
